

# Unidesktop (Parallels)

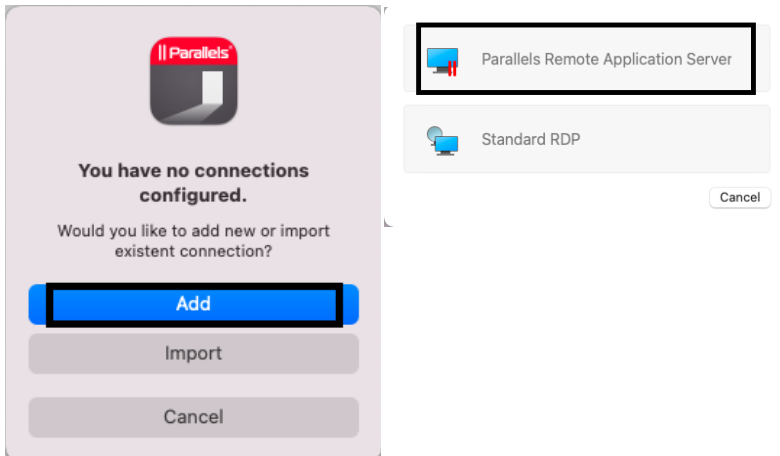

## Installation instructions to configure Mac client

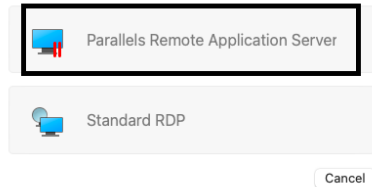

1. Install the 'Parallels Client' from the App Store.

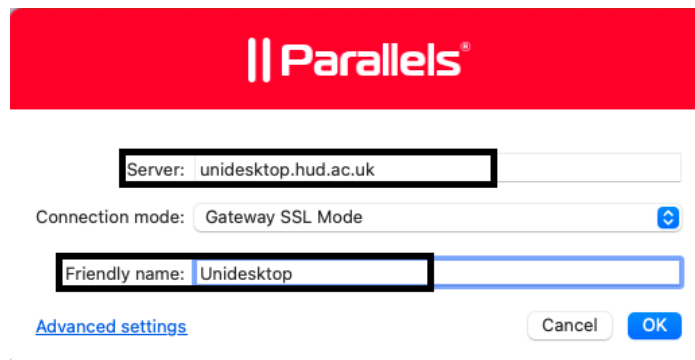

2. Back to the Unidesktop application server configuration screen.

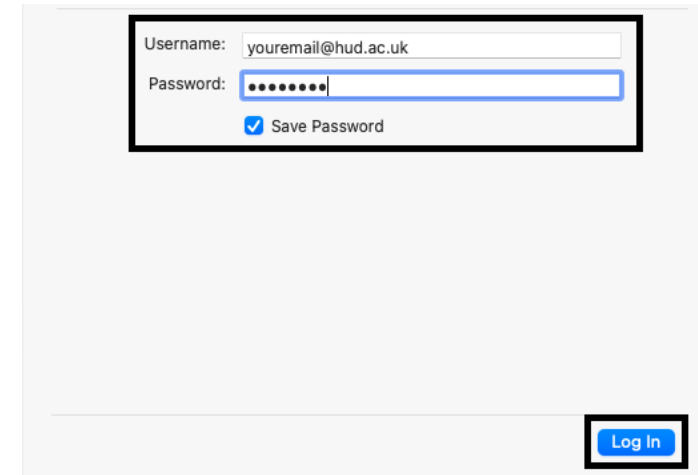

3. In the Unidesktop application server configuration screen, select 'Parallels Remote Application Server'.

4. In the Unidesktop application server configuration screen, enter the server details.

5. In the login screen, enter the username and password.

6. You should now be all setup and you will be able to run the Unidesktop application from here.
