

# UniDesktop- Uninstall old vWorkspace client

## Removing the old vWorkspace client:

Before you install the new UniDesktop software, ensure that you uninstall the old vWorkspace client from your machine, as this may cause problems with the installation.

To do this follow these steps:

- Go to the **Control Panel**
- Choose **Programs** and then **Programs and Features**
- **OR** select **Uninstall a program** under **Programs**
- Find the old vWorkspace and select it
- Select the **Uninstall** options from the menu. A dialog box will appear and click **Yes**

(Note: This is only necessary for those who have previously had the UniDesktop software on their machines)
